Objective

Current senior undergraduate in electrical engineering interested in entry-level positions in the Bay Area. Seeking to combine technical skills from project experience and coursework, including iterative design testing, circuit construction, and schematic design to solve real-world engineering challenges in embedded, microcontroller, or power systems.

Education

University of California: Santa Cruz

Expected June 2027

Bachelor of Science (B.S) in Electrical Engineering: Concentration in Electronics/Optics | GPA: 3.55

Santa Cruz, CA

Relevant coursework | Power Generation & Control, Analog Electronics, Circuits Analysis, Signals & Systems, Microcontroller System Design, Embedded Systems, Electromagnetism, Digital Logic Design, Optoelectronics & Photonics, Python, Assembly & RISC-V, C, C++

Experience

Peer Coach

May 2026 - Present

UCSC Career Success

Santa Cruz, CA

- Works in a team of 8 to provide career-related resources to undergraduate students through one-on-one meetings
- Prepares workshops and presentations for students about information on generating actionable plans for a successful career in any field
- Communicates through different mediums such as email and Zoom to improve communicative efficiency for all students

Freelance Photographer

April 2024 - Present

Tim Doan Photography (Self-Employed)

San Francisco Bay Area, CA

- Averaging 4 professional gigs per month by prioritizing customer satisfaction and maintaining positive relationships with clients
- Works frequently with companies such as LifeTouch, GradImages, Mount Hermon Association, and MarathonFoto
- Organizes and facilitates campaigns on different media platforms such as Instagram and Fiverr to increase visibility to potential clients

Student Worker

April 2024 - January 2025

UCSC Transportation & Parking Services

Santa Cruz, CA

- Lead teams of 3 to increase data-collection efficiency by 200% through strategic planning to survey 10 parking lots across campus
- Worked in teams of 6 to increase directional traffic flow by 50% by determining optimal pathing for vehicles at campus intersections
- Designed, printed, and delivered parking signs to different areas on campus to increase efficient parking regulations

Projects

Study Buddy - C++, ESP32 hardware, KiCAD Circuit & PCB Design

April 2026 - Ongoing

Personal Project

- Designing a desktop device that uses the Pomodoro Technique to keep users accountable for work productivity and maximize efficiency
- Implementing C++ programming, ESP32 microcontroller hardware, KiCAD schematic and PCB design to improve ongoing iterations
- Documenting ongoing progress in an engineering notebook to maintain an organized log of data entries and design notes

Technical Skills

Programming & Software | KiCAD, PSPICE, PSCAD, PowerWorld, MATLAB, Python, Assembly & RISC-V, C, C++, PlatformIO, STM32Cube

Hardware & Tools | Oscilloscope, Digital Multimeter, Soldering, PCB Design, Arduino, STM32 Nucleo, PIC32 Microcontroller, ESP32

Proficient Topics | Power systems, Transformers, Circuit analysis, Optoelectronics, Embedded systems, Digital/Analog systems, Microcontrollers
